

# Change the World Webinar 4: Knowledge Systems to Enable Urban Safety

## 10 February 2021

**Data and knowledge** are *political* and *powerful* and their use in the development of policy and problem solving is fundamental to the ability of the global urban safety sector to **build, test, adapt and share innovative and transformative practices** and approaches which **respond effectively to vulnerability and unsafety** in all their forms across the globe.

*This webinar will discuss opportunities and concerns linked to **knowledge building, data, adaptive learning** and **the link between knowledge, policy and practice**.*

*How to safely democratise the use of data?*

*How to integrate different types of data?*

*How to build the credibility and usability of qualitative data?*

*How to better manage data and knowledge to support better policy?*

### **Join us for a discussion with:**

International Centre for the Prevention of Crime  
International Institute for Democracy and Electoral Assistance  
Belize Crime Observatory  
Organization for American States

### **Hosted by:**

Alliance of NGOs on Crime Prevention and Criminal Justice
